DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wessel, DE 199 22 327 in view of Shimirak et al., U.S. Patent 4,908,482.

Wessel discloses a bicycle shift control device comprising an outer casing 2 having a cable receiving bore and an access opening, a cable operated winding mechanisms disposed in the outer casing having a cable attachment point 11 disposed relative to the access opening to be accessible from the access opening, and a maintenance cover movable coupled to the outer casing between a closed position overlying the access opening and an open position exposing the access opening, but fails to show the cover sliding on an outer surface of the outer casing.

Shimirak et al. teaches, in Fig. 1d, a cable receiving casing 3 comprising an access opening 8 and a maintenance cover 6 movably to the outer casing between a closed position overlying the access opening and an open position exposing the access opening, wherein the maintenance cover slides on an outer surface of the outer casing along an arcuate path substantially parallel to the outer surface of the casing.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the hinged maintenance cover of Wessel with the sliding

maintenance cover as taught by Shimirak et al. in order to provide a device that requires more fully opened access space to maintain its mechanism so that maintenance is easier.

Response to Arguments

3. In response to the applicant's argument that Miller is non-analogous, the Examiner agrees with the applicant and thus withdraws the previous Office action.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sliding door for accessibility.

Yamamura, U.S. Patent 5,354,968

Hayes, UK Patent 2,223,132 A

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chong H. Kim whose telephone number is (703) 305-0922. The examiner can normally be reached on Tuesday - Friday; 8:00 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Bucci can be reached on (703) 308-3668. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9326.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
